IFP-2000VIP

The IFP-2000VIP is an intelligent analog/addressable fire alarm control panel combined with an integrated single channel voice evacuation system. The basic IFP-2000VIP system has one onboard signal line circuit (SLC) loop which can support 159 IDP sensors and 159 IDP modules.

The IFP-2000VIP has eight on-board Flexput™ circuits that can be configured for auxiliary power, notification outputs, or for conventional smoke detector inputs (Class A or Class B). The FACP also has a built-in, dual-line digital fire communicator, Form C trouble relay, and two programmable Form C relays. The firmware has powerful features such as detector sensitivity, day/night thresholds, drift compensation, pre-trouble maintenance alert, and calibration trouble alert.

The IFP-2000VIP supports a variety of devices, including RA-2000 remote annunciator, 5824 serial/parallel printer interface module (for printing system reports), RPS-1000 intelligent power module, and Intelligent Device Protocol (IDP) devices.

The IFP-2000VIP places all of the critical user interface controls at the main panel. This seamless combination of fire detection and voice evacuation technology simplifies operation and programming of the entire system. The IFP-2000VIP system is scalable from 50 to 400 watts using a distributed amplification scheme to provide the power to the appropriate areas for evacuation coverage.

Features

- Built-in support for up to 159 IDP sensors and 159 IDP modules, expandable to 636 points per IFP-2000 panel.
- All the features of the IFP-2000 Fire Alarm Control Panel combined with a fully integrated voice evacuation system
- Built-in Digital Message Repeater using DSP technology
- Three field programmable user messages
- Upload/download voice messages using a PC and the 7780 voice messaging application
- Program voice messages via serial interface or built-in microphone
- Support for up to eight VIP-50s (50 watt SBUS addressable amplifiers) for a maximum of 400 watts per system
- Single enclosure for both fire and voice system control components
- On-board supervised microphone
- System can support two supervised remote microphones (VIP-RM2000s)
- Up to 64 mappable speaker circuits using a combination of VIP-50s and VIP-CE4s
- Supports 25 Vrms or 70.7 Vrms speaker circuits
- Built-in Ethernet and USB interface for programming
- Improvements in SKSS-2 delivers five times faster upload/downloads
- All call and Non-Alarm buttons to quickly select all active or all the non-active output groups
- 999 software zones and 999 output groups
- Jumpstart® auto-programming

Installation

The IFP-2000VIP can be surface or flush mounted.

Compatibility

The IFP-2000VIP is compatible with the following voice evacuation components:
- VIP-50 50 watt amplifier
- VIP-125 125 watt amplifier
- VIP-RM2000 remote microphone
- VIP-SW16 16 switch expander
- VIP-VCM voice control module
