

Inspection Manager

eVance® Series

About eVance® Services

eVance Services is a Cloud-based suite of solutions that streamlines and improves commissioning, test, inspection, and service management operations. eVance Services provides a desktop administrative portal for customer account setup; onboarding and assignment of technicians; set-up and data import of buildings, fire panels, devices, and related equipment information; as well as tracking and display of event alerts for connected devices. Technicians utilize Inspection Manager and Service Manager on mobile devices in the field for building inspection and service management. These applications can be licensed separately or together.

eVance® Inspection Manager®

eVance Inspection Manager is a mobile inspection application, paired with a central web-based portal, that makes fire/life-safety system inspection, testing, commissioning and compliance reporting more efficient and cost-effective, and adds value to the end-customer through consistency and comprehensiveness. Field technicians utilize the application on a hand-held device to follow test plans and record testing results during walk tests. This ensures that all installed equipment and devices are consistently tested, defects are recorded, and corrective repair actions taken. Required compliance and information reports can be generated and signed on premises. Field Technicians use Inspection Manager to:

- Follow test plans by selecting subsets from the full equipment list to easily perform partial building tests to meet quarterly, semi-annual, and/or annual compliance requirements.
- Use Honeywell web portals to pull data directly from supported Gamewell-FCI fire panels for addressable devices.
- Test and record results of non-addressable devices using barcodes and scanning.
- Use the device camera to take digital photos of equipment or areas requiring corrective action and to store with the inspection data.
- Store background notes and comments on buildings/facilities that won't display in final reports.
- Generate the desired report using templates in real-time, add a signature, and email to the client.
- Keep track of test progress with total number of devices tested and total devices remaining.
- Conduct a Walk Test independently, or with multiple technicians working simultaneously.

*Displayed in real-time for systems and devices connected to the central website.

FEATURES & BENEFITS

Data Management

- Import addressable devices utilizing web portal card
- Import existing device lists utilizing Excel or CAMWorks files
- Utilize barcodes and scanner to manage testing results for non-addressable devices
- Choice of barcode scanning device:
 - mobile device
 - onboard camera
 - separate scanning devices
- Android and iOS compatible

Time Savings

- After facility setup and initial testing is completed, time savings of up to 50% for subsequent tests have been demonstrated
- Test plans, which can be edited in the field, and subsequent tests utilize existing device lists; these can be updated in seconds as new devices are found or others are eliminated

- Walk tests are facilitated by the easy-to-use pass/fail/skip feature and note entries as necessary
- Search and sort functions make item list review quick and easy
- Technicians always know the test status, number of devices tested, and total devices remaining to test

Reporting

- Utilize NFPA 72, NFPA 10, NFPA 25, NFPA 2001, NFPA 72 Quarterly, ULC 536, ULC 536 Monthly, ULC 537, Joint Commission, Corrective Action, Device Sensitivity, NFPA Record of Completion, General Report or Facility Inspection templates to generate a report
- Data is available in xls format upon request

- Reports are professionally formatted and can include business information, logo, and signature
- Reports can be accessed 24/7, and access to reports can be set up for the building owner, facilities manager, and/or Authorities Having Jurisdiction
- Email or print reports as needed

eVance® Services

SERVICE TECHNICIAN

Connected device
3G/4G, Wi Fi

- Mobile Application
- Accept/decline assigned jobs
- View customer and building information

INSTALLERS SERVICE TECHNICIANS INSPECTORS

Connected device
3G/4G, Wi Fi

- Real time event data
- Addressable device information (Web Portal)
- Add and edit data from non-connected devices or other equipment (manual entry or barcode)
- Conduct inspection and testing
- Generate reports

HOSTED / SECURE DATA CENTER

- Real time event data
- Addressable device information (Web Portal)
- Data from non-connected devices (manual entry or barcode)

ADMINISTRATOR

- Create customers and buildings
- Add and assign technicians
- Create device lists
- Create test plans
- View active events/alerts
- Create service jobs
- Customize reports
- Archive of historic reports

FACILITY OWNER/MANAGER

- Access and view proprietary online current and historic reports
- View active events (Web Portal Card)

Software Licensing

eVance Inspection Manager software is purchased as an annual license. Administrators and end-customers with access to their reports do not require a license.

Software License Upgrades

License upgrades can be purchased to add additional licenses. Upgrade orders should be placed within 9 months after the yearly license period has started.

Product Information

Inspection Manager Licenses:

INSPECT1: Gamewell-FCI Inspection Manager, 1 user.

INSPECT5: Gamewell-FCI Inspection Manager, 5 users.

INSPECT10: Gamewell-FCI Inspection Manager, 10 users.

INSPECT15: Gamewell-FCI Inspection Manager 15 users.

INSPECT20: Gamewell-FCI Inspection Manager, 20 users.

INSPECT30: Gamewell-FCI Inspection Manager, 30 users.

Trial License:

EVANCETRIALIMSM: Trial for Service Manager (5 licenses), and Inspection Manager (5 licenses).

Inspection Manager Technical Specifications

SYSTEM REQUIREMENTS & ACCESSORIES

The eVance Services software is designed to run on a desktop or laptop computer using Google Chrome™ (preferred browser for best performance), Firefox® a registered trademark of Mozilla, or Internet Explorer (version 10.0 or higher).

Monitor screen resolution: Recommended setting is 1680 x 1050, with a minimum resolution of 1280 x 1024

Mobile Software (Inspection Manager and Service Manager) is best viewed on: iPhone® 5/5S, 6/6Plus, 7/7Plus, iPod Touch®

Android™: KitKat OS 4.4 or later

All personal computer and mobile devices: Provided by the customer

Additional Hardware that can be used in conjunction with Inspection Manager Includes: GW-WEBPORTAL

Web portal that connects Gamewell-FCI fire panels to the secure data center.

See GW-WEBPORTAL Data Sheet, PN-9021-60802.

SCANNER OPTIONS:

Options for Apple mobile devices:

Onboard camera for Apple mobile devices: Supplied by the user.

Socket Mobile SocketScan™ S800 and S850 barcode scanners: Purchased by the user and available through a number of on-line retailers.

Captuvo Sled: available from Gamewell-FCI

Options for Android Mobile Devices:

Onboard camera for Android mobile devices: supplied by user.

SCANNER-BT: See Data Sheet, P/N:9021-60808, available from Gamewell-FCI.

BARCODE-1000: Roll of 1,000 barcode labels. Barcode labels may be purchased from Gamewell-FCI or printed by customer.

Bluetooth Headset: Optional for the Inspection Manager and it is provided by the customer.

Recommended Headsets: Plantronics® Voyager Legend (p/n 87300-01) and the Jawbone ERA®

STANDARDS

The Inspection Manager is designed to comply with the following standards:

UL: S635

UL / ULC: S1570

The eVance Services Secure/Hosted Data Center is located in the United States and is compliant with the following standards:

SSAE 16 and ISAE 3402 Audit Standards: Formerly SAS 70

The SOC 3 SysTrust® Service Organizations Seal of Assurance

AGENCY LISTINGS AND APPROVALS

These listings and approvals apply to the modules specified in this document. In some cases, certain modules or applications may not be listed by certain approval agencies, or listing may be in process. Consult the factory for the latest listing status.

UL: S635

UL/ULC: S1570

ISO 9001 Certification

Available in Google play store and in Apple APP store.
